

Silen is committed to becoming a truly sustainable business. We want our products and services to support the environment just like they support the creativity and the businesses of the people using them.

When using our pods you can feel confident that all Silen's activities are conducted in accordance with sound environmental practices.

Silen's 6 promises to our planet

- We minimise the consumption of natural energy and resources, and consume material goods in moderation.
- We reduce waste by adopting improved operating practices and by recycling materials whenever possible (and practical).
- We ensure that all waste and effluent is disposed of in a safe and responsible manner.
- We reduce emissions to levels that help to avoid adverse impacts on the environment.
- We continually source and evaluate products that have a lower impact on the environment.
- We comply with the environmental legislation and operate in a socially responsible manner.

Our next aim is to foster an understanding of environmental issues among our suppliers and customers. We believe it is our collective task to continually improve the environmental impact of our activities.
